PROPNEX AI TECHNOLOGY

150 Questions & Answers - Hinglish Edition (Cleaned)

Voice Agent Product Pitching | Customer Enquiries | Business Automation

Is document mein kya hai?
150 Q&A, 16 topics mein. Language ko saaf, bolchaal wali Hinglish mein likha gaya hai, taaki voice agent ki script ke roop mein use ho sake.

Customer use se pehle zaroor karein
Actual products, approved pricing, trial policy, integrations, contact details aur service commitments ke hisaab se answers update karein. Founder ka naam (Tanishq Gupta) bhi ek baar confirm kar lein. Aise claims na karein jo company ne approve nahi kiye hain.

Training note
Sirf text se TTS voice model train nahi hota. Voice train karne ke liye clean recordings aur unke exact transcripts chahiye hote hain. Existing TTS API ke saath yeh answers spoken scripts ki tarah use ho sakte hain.

Company aur Brand ka Parichay

Q1. Propnex AI Technology kya hai?

Jawab: Propnex AI Technology practical AI solutions banati hai, jaise voice agents aur business process automation. Hum businesses ki madad karte hain taaki unka baar-baar hone wala kaam kam ho aur customers ko behtar service mil sake.

Q2. Propnex AI Technology ka maksad kya hai?

Jawab: Hamara maksad hai ki kaam aane wala AI alag-alag size ke businesses tak aasaani se pahunche. Hum aise solutions par focus karte hain jo time bachayein, team ko support dein aur customer experience ko smooth banayein.

Q3. Propnex AI Technology ko kisne shuru kiya?

Jawab: Propnex AI Technology ke founder aur CEO Tanishq Gupta hain. Company is soch par bani hai ki AI ko business ki asli problems solve karne ke liye use kiya jaye.

Q4. Propnex AI Technology kyun shuru ki gayi?

Jawab: Idea yeh tha ki practical AI ke mauke ko aise products mein badla jaye jo businesses ke sach mein kaam aayein. Hamara focus asli workflow problems solve karne par hai, bina maksad ke technology jodne par nahi.

Q5. Propnex AI Technology doosron se alag kaise hai?

Jawab: Hum pehle customer ka workflow samajhte hain aur dekhte hain ki automation kahan sabse zyada fark la sakti hai. Hamara solution aapke business, aapke maujooda tools aur aapke customers ke hisaab se banta hai.

Q6. Propnex AI Technology kin logon ke saath kaam karti hai?

Jawab: Hum startups, chhote aur medium businesses, aur bade organisations ke saath projects explore kar sakte hain. Sahi approach aapki zaroorat, maujooda systems, budget aur implementation requirements par depend karti hai.

Q7. Kya Propnex AI Technology sirf AI voice agents par kaam karti hai?

Jawab: Nahi, voice agent ek option hai. Hum document processing, workflow automation, data handling aur customer operations mein bhi madad kar sakte hain. Pehle hum aapka use case samajhte hain, phir sahi approach suggest karte hain.

Q8. Company ka long-term vision kya hai?

Jawab: Hamara vision hai aise AI products banana jo businesses ko zyada efficiently kaam karne mein madad karein. Hum chahte hain ki technology logon aur processes ko reliable aur responsible tarike se support kare.

Q9. Main Propnex AI Technology se kaise contact kar sakta hoon?

Jawab: Aap company ke official contact channels ke zariye Propnex team se baat kar sakte hain. Bas apni business problem aur pasand ka contact method bata dijiye, taaki sahi insaan aapse follow up kar sake.

Q10. AI voice agent kya hota hai?

Jawab: AI voice agent ek aisa system hai jo bole gaye shabd sun sakta hai, request samajh sakta hai aur generated awaaz mein jawab de sakta hai. Design ke hisaab se yeh sawaalon ke jawab de sakta hai, leads qualify kar sakta hai, callback schedule kar sakta hai aur routine enquiries mein madad kar sakta hai.

Q11. Voice agent mere business ki kaise madad karega?

Jawab: Voice agent aam sawaalon aur support calls ko office hours ke baad bhi sambhal sakta hai. Yeh zaroori jaankari ek jagah collect kar sakta hai aur mushkil requests ko team ke kisi insaan ko de sakta hai.

Voice Agent ki Basic Jaankari

Q12. Kya voice agent humare products pitch kar sakta hai?

Jawab: Haan, voice agent approved product information samjha sakta hai, discovery questions pooch sakta hai aur agla sahi step suggest kar sakta hai. Uski script sahi honi chahiye aur usme aise wade nahi hone chahiye jo business ne authorise nahi kiye.

Q13. Kya AI agent outbound calls kar sakta hai?

Jawab: Haan, jahan use case, platform aur local rules allow karte hain, wahan outbound calling ho sakti hai. Customer ki consent, caller ki pehchaan, opt-out ka option aur calling ka sahi time pehle se process mein hona chahiye.

Q14. Kya yeh incoming customer calls le sakta hai?

Jawab: Haan, inbound agent aam sawaalon ke jawab de sakta hai aur caller ki zaroorat ke hisaab se request aage route kar sakta hai. Sensitive ya alag tarah ke cases mein use kisi trained insaan ko transfer karna chahiye.

Q15. Kya voice agent naturally bol sakta hai?

Jawab: Yeh speech model, voice, script, latency aur conversation design par depend karta hai. Asli examples ke saath testing karne se team pronunciation, speed aur baat karne ki baari (turn-taking) ko behtar bana sakti hai.

Q16. Kya voice agent alag-alag accents samajh sakta hai?

Jawab: Yeh speech recognition model aur testing mein shamil accents par depend karta hai. Hum suggest karte hain ki system ko usi language, accent aur call conditions mein test karein jo aapke customers asal mein use karte hain.

Q17. Kya agent call kisi insaan ko transfer kar sakta hai?

Jawab: Haan, achhe se design kiya gaya agent tab call transfer kar sakta hai jab caller maange ya issue uske scope se bahar ho. Transfer ke waqt zaroori context saath jaana chahiye, taaki customer ko sab kuch dobara na batana pade.

Q18. Kya voice agent 24/7 kaam kar sakta hai?

Jawab: Haan, deployed system ko din-raat calls lene ke liye design kiya ja sakta hai, service availability aur operating limits ke andar. Jab system kisi request ko solve na kar paye, tab escalation path aur clear fallback message hona zaroori hai.

Product Pitch aur Lead Qualification

Q19. Agent hamare product ka introduction kaise dega?

Jawab: Woh ek chhote aur transparent introduction se shuru karega aur pooch lega ki customer ke paas baat karne ka time hai ya nahi. Phir woh product ki relevant value saral bhasha mein samjhayega aur sawaal poochne ke liye invite karega.

Q20. Agent sales lead ko qualify kaise karta hai?

Jawab: Woh prospect ki zaroorat, abhi ka process, timeline, approximate requirements aur follow-up ka preferred tareeka poochta hai. Agar integration aur permissions hain, toh yeh jaankari CRM mein record ho sakti hai.

Q21. Kya agent sales meeting book kar sakta hai?

Jawab: Haan, woh preferred date aur time le sakta hai aur approved calendar integration ho toh availability check kar sakta hai. Confirm karne se pehle woh details verify karega aur authorised channel se promised confirmation bhejega.

Q22. Kya agent interested prospects ko follow up kar sakta hai?

Jawab: Haan, follow-up workflow aise prospects ko contact karne ke liye set kiya ja sakta hai jinhone contact hone ki permission di hai. Timing, frequency, consent aur opt-out preferences ka dhyan rakhna zaroori hai.

Q23. Agent 'Mujhe interest nahi hai' ko kaise handle karega?

Jawab: Woh politely jawab accept karega aur person par koi pressure nahi daalega. Agar customer kahe, toh woh opt-out record karega, taaki aage outreach band ho jaye.

Q24. Kya agent pricing samjha sakta hai?

Jawab: Agent wahi pricing, packages aur conditions bata sakta hai jo business ne approve ki hain. Agar pricing scope par depend karti hai ya confirm nahi hai, toh woh sales team ke saath discussion arrange karne ki offer dega.

Q25. Kya agent humare product ki competitor se tulna kar sakta hai?

Jawab: Woh approved aur current information ke basis par verified differences bata sakta hai. Usko aise claims nahi karne chahiye jinka saboot na ho, aur competitor ke baare mein koi unfair ya unverified baat nahi kehni chahiye.

Q26. Kya agent prospects ki objections handle kar sakta hai?

Jawab: Haan, woh aam concerns ka short aur factual jawab de sakta hai aur kaam ke sawaal pooch sakta hai. Complex commercial, legal ya technical objections ke liye woh human follow-up offer karega.

Q27. Kya agent call ke baad brochure bhej sakta hai?

Jawab: Agar messaging ya email integration configure hai aur customer agree karta hai, toh agent approved brochure bhejne ka trigger de sakta hai. Woh pehle destination confirm karega aur jab tak system confirm na kare, tab tak yeh nahi kahega ki file bhej di gayi.

Automation aur Workflows

Q28. Business process automation kya hota hai?

Jawab: Business process automation mein software ek workflow ke baar-baar hone wale steps khud perform karta hai. Isse manual data entry kam hoti hai, routine kaam standard hote hain aur teams kaam ko behtar track kar paati hain.

Q29. Kaun se kaam automation ke liye achhe candidates hain?

Jawab: Jin kaamon mein clear rules, repeated steps, structured information aur measurable results hote hain, woh aksar achhe candidates hote hain. Jaise requests ko route karna, records update karna, routine reports banana aur status notifications bhejna.

Q30. Kya Propnex repetitive office work automate karne mein madad kar sakti hai?

Jawab: Haan, hum repetitive workflows ko assess karte hain aur AI ya software automation ke possible mauke dhundhte hain. Final design involved systems, data quality, permissions aur business requirements par depend karta hai.

Q31. Kya automation alag-alag software systems ko connect kar sakti hai?

Jawab: Haan, integrations APIs, approved connectors ya doosre supported methods se systems ko connect kar sakte hain. Implementation se pehle team data access, security, reliability aur vendor limitations check karti hai.

Q32. Workflow kya hota hai?

Jawab: Workflow un steps ka sequence hota hai jo kisi kaam ko shuru se poora hone tak le jaata hai. Automation steps trigger kar sakti hai, conditions check kar sakti hai, kaam assign kar sakti hai aur zaroorat par logon ko notify kar sakti hai.

Q33. Kya automation se human errors kam hote hain?

Jawab: Jab rules aur source data sahi hon, tab automation kuch repetitive entry aur handoff errors kam kar sakti hai. Phir bhi monitoring, exception handling aur time-time par checks zaroori hain, taaki galat input ya anokhe cases pakde ja sakein.

Q34. Kya automated tasks ke liye human approval chahiye hoti hai?

Jawab: Haan, important steps ko poora hone se pehle human review ke liye rok sakte hain. Yeh payments, sensitive communication, compliance decisions aur aise changes ke liye khaas taur par kaam ka hai jinhe palatna mushkil ho.

Q35. Agar koi automated task fail ho jaye toh kya hota hai?

Jawab: Ek reliable workflow error ko record karta hai, jahan sahi ho wahan safely retry karta hai aur zimmedar insaan ko alert bhejta hai. Woh duplicate actions se bachta hai aur manual recovery ka clear raasta bhi deta hai.

CRM, Sales aur Customer Support

Q36. Kya workflows automatically reports bana sakte hain?

Jawab: Haan, agar zaroori data accessible ho aur report ka format tay ho. Automated reports mein reporting period, data source aur limitations dikhne chahiye, taaki users unhe sahi samajh sakein.

Q37. Kya AI humara CRM update kar sakta hai?

Jawab: Haan, agar integration un actions ko support karta hai aur permissions mile hain, toh connected agent CRM records bana ya update kar sakta hai. Validation rules se incomplete, duplicate ya galat match hue records ko rokna chahiye.

Q38. Kya yeh customer calls ka summary bana sakta hai?

Jawab: Suitable speech processing aur consent ke saath system summary, key needs, action items aur follow-up suggestions bana sakta hai. Jo summaries important customer commitments se jude hon, unhe review karna chahiye.

Q39. Kya yeh customer enquiries ko route kar sakta hai?

Jawab: Haan, rules ya AI classification se enquiries ko category mein baant kar sahi team ko bheja ja sakta hai. Unclear ya high-priority requests ke liye ek fallback queue bhi honi chahiye.

Q40. Kya yeh aam sawaalon (FAQs) ke jawab de sakta hai?

Jawab: Haan, support agent approved knowledge sources se aam sawaalon ke jawab de sakta hai. Jab jawab missing, purana ya bahut sensitive ho, tab woh apni uncertainty bataye aur call kisi insaan ko de.

Q41. Kya yeh support tickets bana sakta hai?

Jawab: Agar ticketing platform se connected hai, toh agent issue ki details lekar sahi category aur priority ke saath ticket bana sakta hai. Customer ko reference number tabhi dena chahiye jab ticket creation confirm ho jaye.

Q42. Kya yeh order status check kar sakta hai?

Jawab: Haan, agar business ek secure aur authorised connection de, toh yeh order status nikaal sakta hai. Private order details batane se pehle identity check zaroor karna chahiye.

Q43. Kya yeh customer feedback collect kar sakta hai?

Jawab: Haan, agent feedback ke kuch chhote sawaal pooch sakta hai aur responses analysis ke liye record kar sakta hai. Feedback dena voluntary hona chahiye aur customer ke paas baat khatam karne ka aasaan tareeka hona chahiye.

Q44. Kya yeh sales logon ko follow-up ki yaad dila sakta hai?

Jawab: Haan, automation agreed CRM events, deadlines ya customer preferences ke basis par reminders bana sakti hai. Reminders sahi owner tak jaane chahiye aur unnecessary duplicate notifications nahi hone chahiye.

Q45. Kya system urgent requests pehchaan sakta hai?

Jawab: Urgency ka andaaza keywords, customer ke choices aur pehle se tay business rules se lagaya ja sakta hai. Critical cases ke liye escalation criteria clear hone chahiye, kyunki automated classification kabhi galat bhi ho sakti hai.

Real Estate aur Construction

Q46. AI real estate company ki kaise madad karta hai?

Jawab: AI lead qualification, property enquiries, appointment scheduling, document workflows aur follow-up reminders mein madad kar sakta hai. Sabse achha use case company ke sales process aur property data par depend karta hai.

Q47. Kya voice agent property buyers ko qualify kar sakta hai?

Jawab: Haan, woh location, budget range, property type, purchase timeline aur contact ka preferred tareeka pooch sakta hai. Agent sirf zaroori jaankari le aur qualified leads sales team ko pass kare.

Q48. Kya yeh site visits schedule kar sakta hai?

Jawab: Haan, scheduling workflow preferred slots le sakta hai aur calendars connected hon toh availability check kar sakta hai. Appointment final karne se pehle site, date, time aur contact details confirm karni chahiye.

Q49. Kya AI channel partners aur builders ki madad kar sakta hai?

Jawab: Haan, ek shared workflow enquiries organise kar sakta hai, leads assign kar sakta hai, follow-ups track kar sakta hai aur authorised partners ko status dikha sakta hai. Access controls zaroori hain, taaki har partner sirf wahi dekhe jo use dekhne ki permission hai.

Q50. Kya yeh kisi project ke baare mein sawaalon ke jawab de sakta hai?

Jawab: Haan, woh approved project details se jawab de sakta hai, jaise location, amenities, unit types aur published timelines. Legal disclosures, availability, prices aur possession dates hamesha current authorised records se aani chahiye.

Q51. Kya automation construction progress track kar sakti hai?

Jawab: Haan, jab project team updates, documents, photos aur milestone status deti hai, tab system unhe collect kar sakta hai. Usko verified site information aur andaaze ya unconfirmed reports mein fark saaf dikhana chahiye.

Q52. Kya AI property documentation mein madad kar sakta hai?

Jawab: Haan, document automation fields nikaal sakti hai, missing items flag kar sakti hai aur files ko review ke liye route kar sakti hai. Legal documents aur ownership se jude faislon ko phir bhi qualified professionals se check karwana chahiye.

Q53. Kya yeh buyers ko payments ke liye remind kar sakta hai?

Jawab: Haan, verified payment schedule aur account records ke basis par system authorised reminders bhej sakta hai. Financial information ko protect karna chahiye aur disputes ya corrections ke liye kisi insaan ka contact dena chahiye.

Q54. Kya AI maintenance requests manage karne mein madad kar sakta hai?

Jawab: Haan, residents voice ya digital channels se issues report kar sakte hain aur automation unhe categorise aur assign kar sakti hai. Status updates asli work-order information par based hone chahiye, andaaze par nahi.

Healthcare aur Clinics

Q55. AI clinic ki kaise madad kar sakta hai?

Jawab: AI appointment requests, aam administrative sawaalon, reminders aur calls ko staff tak route karne mein madad kar sakta hai. Yeh qualified doctor ke clinical judgement ya emergency services ki jagah nahi le sakta.

Q56. Kya voice agent appointments book kar sakta hai?

Jawab: Haan, woh appointment preferences le sakta hai aur authorised scheduling system se availability check kar sakta hai. Cancellations, urgent symptoms aur booking conflicts kaise handle honge, yeh clinic ko pehle se tay karna chahiye.

Q57. Kya yeh patients ko visits ke liye remind kar sakta hai?

Jawab: Haan, appropriate consent aur privacy safeguards ke saath system approved channels se reminders bhej sakta hai. Messages mein sirf minimum zaroori jaankari honi chahiye.

Q58. Kya AI medical sawaalon ke jawab de sakta hai?

Jawab: Woh carefully approved general information de sakta hai, lekin diagnose nahi karega aur treatment prescribe nahi karega. Jo symptoms urgent ho sakte hain, unke liye caller ko qualified medical care ya emergency services ki taraf bhejna chahiye.

Q59. Kya yeh patient records handle kar sakta hai?

Jawab: Patient records tak koi bhi access strict authorisation, security aur applicable privacy rules ke compliance ke saath hi hona chahiye. System sirf wahi jaankari access kare jo uske kaam ke liye zaroori hai.

Q60. Kya yeh missed appointments kam kar sakta hai?

Jawab: Timely reminders aur confirm ya cancel karne ke simple options patients ko appointments manage karne mein madad kar sakte hain. Results ko clinic ki purani baseline se naapna chahiye, maan kar nahi chalna chahiye.

Q61. Kya agent patient ko clinic staff ko transfer kar sakta hai?

Jawab: Haan, handoff patient ki request par, unclear issue par ya kisi pehle se tay risk indicator par ho sakta hai. Workflow aisa ho ki staff ko transfer ka reason aasaani se dikh jaye.

Q62. Kya yeh multiple languages support karta hai?

Jawab: Jab suitable speech aur language models available hon, tab multilingual support possible hai. Har language ko accuracy, pronunciation aur clinic ki terminology ke liye test karna chahiye.

Q63. Healthcare AI privacy kaise protect kare?

Jawab: Access controls, jahan sahi ho wahan encryption, limited retention, audit logs aur approved data-handling procedures use karne chahiye. Deployment se pehle clinic ko applicable legal aur professional requirements review karni chahiye.

Banking, Finance aur Accounting

Q64. AI accounting firm ki kaise madad karta hai?

Jawab: AI document intake, data extraction, checklist tracking, reminders aur draft summaries banane mein madad kar sakta hai. Submission se pehle financial calculations, filings aur advice ko qualified staff review kare.

Q65. Kya yeh invoice processing mein madad kar sakta hai?

Jawab: Haan, automation invoice details nikaal sakti hai, unhe purchase records se match kar sakti hai aur mismatches ko review ke liye flag kar sakti hai. Approval rules aur duplicate checks galat ya repeated payments rokne mein madad karte hain.

Q66. Kya AI tax documents taiyaar kar sakta hai?

Jawab: Jahan software aur rules allow karte hain, wahan yeh source documents organise kar sakta hai aur draft fields bhar sakta hai. Calculations, eligibility aur final submission ko qualified tax professional hi verify kare.

Q67. Kya yeh transactions reconcile karne mein madad kar sakta hai?

Jawab: Haan, system dates, amounts, references aur configured rules se records match kar sakta hai aur unmatched items flag kar sakta hai. Reconciliation ko complete maanne se pehle exceptions review kiye jaane chahiye.

Q68. Kya yeh payment reminders bhej sakta hai?

Jawab: Haan, agar organisation workflow authorise kare aur verified account data use ho. Message respectful aur accurate hona chahiye aur galat balance ko dispute karne ka tareeka bhi dena chahiye.

Q69. Kya AI investment advice de sakta hai?

Jawab: Ek general-purpose voice agent ko bina approval ke personalised financial advice nahi deni chahiye. Regulated recommendations ke liye proper qualifications, disclosures, suitability checks aur compliance controls zaroori hain.

Q70. Kya yeh bank customer service support kar sakta hai?

Jawab: Haan, yeh general FAQs, branch information aur kuch selected account-service workflows handle kar sakta hai, secure identity verification ke saath. Sensitive transactions ke liye strong authentication aur institution ke approved controls chahiye.

Q71. Kya automation suspicious transactions pakad sakti hai?

Jawab: Rules aur analytical models patterns flag kar sakte hain, lekin flag ka matlab fraud ka saboot nahi hota. Financial professionals ko alerts review karne chahiye aur institution ki approved procedure follow karni chahiye.

Q72. Kya yeh accounting software ke saath kaam karta hai?

Jawab: Yeh software ke APIs, supported connectors, licensing aur permissions par depend karta hai. Live records badalne se pehle hum technical route validate karenge aur non-production data par test karenge.

Manufacturing aur Supply Chain

Q73. AI manufacturing company ki kaise madad karta hai?

Jawab: AI aur automation maintenance alerts, production reporting, document handling aur workflow coordination mein madad kar sakte hain. Use case ko safety, downtime risk aur plant-system constraints ke hisaab se assess karna chahiye.

Q74. Kya automation inventory monitor kar sakti hai?

Jawab: Haan, connected system stock levels track kar sakta hai aur quantity agreed limit se neeche jaane par alert bhej sakta hai. Sahi results ke liye inventory records accurate aur time par update hone chahiye.

Q75. Kya AI equipment failure predict kar sakta hai?

Jawab: Jab suitable sensor aur maintenance data ho, tab predictive maintenance models failure ke badhte risk ke patterns pakad sakte hain. Inhe validate karna padta hai aur yeh safety procedures ki jagah nahi, unke saath kaam karne ke liye hain.

Q76. Kya voice agent warehouse staff ki madad kar sakta hai?

Jawab: Environment aur devices ke hisaab se staff hands-free approved information le sakta hai ya status report kar sakta hai. Shor, accents, safety rules aur connectivity ko practical testing mein dekhna zaroori hai.

Q77. Kya yeh supplier deliveries track kar sakta hai?

Jawab: Haan, automation expected dates monitor kar sakti hai aur authorised supplier ya logistics systems se status update kar sakti hai. Late ya missing updates ko flag karna chahiye, unhe confirmed delivery nahi maanna chahiye.

Q78. Kya AI purchase orders process kar sakta hai?

Jawab: Haan, yeh order fields nikaal sakta hai, configured rules se compare kar sakta hai aur exceptions ko approval ke liye route kar sakta hai. Zaroori authorisation ke bina purchase commitments issue nahi hone chahiye.

Q79. Kya yeh quality checks mein madad kar sakta hai?

Jawab: Jahan suitable systems aur validated models hon, wahan AI inspection data analyse kar sakta hai ya dikhne wale defects flag kar sakta hai. Quality decisions ke liye acceptance criteria clear hone chahiye aur zaroorat par human oversight rehni chahiye.

Q80. Kya yeh production reports bana sakta hai?

Jawab: Haan, yeh connected data sources se production counts, downtime records aur shift updates jod sakta hai. Reports mein missing data dikhna chahiye aur andaaze ko verified measurement ki tarah pesh nahi karna chahiye.

Q81. Kya automation supply-chain delays kam kar sakti hai?

Jawab: Automated alerts aur saaf handoffs se teams issues ko jaldi notice karke tezi se action le sakti hain. Asli sudhaar supplier ki reliability, data quality aur logon ke response ki speed par depend karta hai.

Education aur Training

Q82. AI educational institution ki kaise madad kar sakta hai?

Jawab: AI admissions enquiries, appointment scheduling, student reminders aur routine administrative sawaalon mein madad kar sakta hai. Academic decisions aur sensitive student matters par insaano ki nigrani honi chahiye.

Q83. Kya voice agent admission ke sawaalon ke jawab de sakta hai?

Jawab: Haan, woh courses, eligibility, dates aur application steps ki approved jaankari bata sakta hai. Agar student ka case alag hai ya policy clear nahi hai, toh sawaal admissions staff ko route karna chahiye.

Q84. Kya yeh prospective students ko follow up kar sakta hai?

Jawab: Haan, appropriate permission ke saath yeh prospects ko application steps yaad dila sakta hai aur callback offer kar sakta hai. Contact preferences aur opt-out requests ka dhyan rakhna zaroori hai.

Q85. Kya AI students ko seekhne mein madad kar sakta hai?

Jawab: Haan, jab is maksad se design kiya jaye, tab AI concepts samjha sakta hai, practice questions bana sakta hai aur guided revision de sakta hai. Use seekhne ko badhava dena chahiye aur uncertain jaankari ko fact ki tarah nahi batana chahiye.

Q86. Kya yeh class schedules manage kar sakta hai?

Jawab: Haan, connected workflow timetable ki jaankari nikaal sakta hai aur approved reminders bhej sakta hai. Badlav institution ke official scheduling source ke basis par hone chahiye.

Q87. Kya yeh fee reminders support karta hai?

Jawab: Haan, yeh verified account records aur authorised policies ke basis par courteous reminders bhej sakta hai. Student ki financial details kisi unauthorised insaan ko nahi batani chahiye.

Q88. Kya AI teachers ki administration mein madad kar sakta hai?

Jawab: Haan, yeh routine communication ka draft likhne, submissions organise karne ya administrative jaankari ka summary banane mein madad kar sakta hai. Teachers ko outputs ki accuracy, fairness aur student privacy ke liye review karna chahiye.

Q89. Kya yeh multiple languages support karta hai?

Jawab: Multilingual support un students aur families tak pahunchne mein madad kar sakta hai jo alag-alag languages pasand karte hain. Institution ko translations test karni chahiye aur important policy ya safeguarding issues ke liye human support deni chahiye.

Q90. Kya AI student performance evaluate kar sakta hai?

Jawab: AI authorised data se learning progress ka summary bana sakta hai, lekin assessments ke liye clear criteria aur educator ki nigrani zaroori hai. High-impact academic faisle sirf automated score par nahi hone chahiye.

Retail aur E-commerce

Q91. AI retail business ki kaise madad karta hai?

Jawab: AI product enquiries, order updates, returns routing aur customer follow-ups mein madad kar sakta hai. Customers ko gumrah na karne ke liye integrations mein current product aur inventory data use hona chahiye.

Q92. Kya voice agent products recommend kar sakta hai?

Jawab: Haan, woh customer ki zaroorat pooch kar approved catalogue se options suggest kar sakta hai. Recommendations relevant, transparent aur accurate product details par based hone chahiye.

Q93. Kya yeh product availability check kar sakta hai?

Jawab: Agar live inventory se connected hai, toh agent product aur location ke hisaab se stock check kar sakta hai. Agar stock information late hai ya verify nahi ho sakti, toh yeh customer ko saaf bata dena chahiye.

Q94. Kya yeh returns process karne mein madad kar sakta hai?

Jawab: Haan, yeh published return policy samjha sakta hai, order details le sakta hai aur eligible return workflow shuru kar sakta hai. Final eligibility retailer ke rules aur zaroori review ke hisaab se hogi.

Q95. Kya AI abandoned carts recover kar sakta hai?

Jawab: Haan, jin customers ne relevant communication ke liye agree kiya hai, unhe system permitted reminders bhej sakta hai. Frequency limits aur opt-out ka dhyan rakhna chahiye, aur message se yeh nahi lagna chahiye ki kharidna zaroori hai.

Q96. Kya yeh delivery ke sawaalon ke jawab de sakta hai?

Jawab: Haan, yeh authorised order ya logistics system se tracking information nikaal sakta hai. Agar tracking status available nahi hai, toh woh yeh bataye aur koi suitable agla step suggest kare.

Q97. Kya AI customer reviews mein madad kar sakta hai?

Jawab: Haan, yeh feedback ke themes categorise kar sakta hai aur team ke liye summaries bana sakta hai. Reviews ko kabhi fake, manipulate ya selectively galat tareeke se pesh nahi karna chahiye.

Q98. Kya yeh retail staff ki madad kar sakta hai?

Jawab: Haan, staff ek internal assistant se approved product information, policies ya operating procedures dhundh sakta hai. Confidential pricing aur internal documents tak access controlled hona chahiye.

Q99. Kya automation promotions mein madad kar sakti hai?

Jawab: Haan, yeh approved campaigns schedule kar sakti hai aur permitted criteria ke mutabik customers ko segment kar sakti hai. Campaign live hone se pehle offers, terms aur audience rules check kar lene chahiye.

Q100. Hum kaise jaanein ki retail automation kaam kar rahi hai?

Jawab: Conversion, resolution time, return handling time, customer satisfaction aur galat jawabon ki rate track karein. Ek baseline use karein aur business outcomes ke saath customer complaints bhi dekhein.

Travel, Hospitality aur Logistics

Q101. AI hotel ki kaise madad karta hai?

Jawab: Voice agent approved hotel information se amenities, check-in times aur service requests ke aam sawaalon ke jawab de sakta hai. Room access, payment ya safety se jude requests mein secure procedures follow hone chahiye.

Q102. Kya yeh restaurant bookings mein madad kar sakta hai?

Jawab: Haan, yeh party size, date, time aur contact details le sakta hai aur authorised booking system check kar sakta hai. Reservation tabhi confirm karni chahiye jab system use verify kar de.

Q103. Kya yeh travel enquiries ke jawab de sakta hai?

Jawab: Jab current sources se connected ho, tab yeh bookings, policies aur travel services ki approved jaankari de sakta hai. Urgent ya complex itinerary changes ke liye customer ko sambandhit provider ke paas bhejna chahiye.

Q104. Kya AI logistics companies ki madad kar sakta hai?

Jawab: Haan, automation shipment-status enquiries, delivery exceptions, document processing aur dispatch coordination mein madad kar sakti hai. Operational updates authorised logistics records se aane chahiye.

Q105. Kya voice agent drivers ko contact kar sakta hai?

Jawab: Ek permitted workflow dispatch information de sakta hai ya status updates le sakta hai, safety aur local calling rules ke andar. Driver ko gaadi chalate waqt system ke saath unsafe tareeke se interact karne ke liye kabhi nahi kehna chahiye.

Q106. Kya yeh delivery complaints manage kar sakta hai?

Jawab: Haan, yeh shipment reference, issue type aur preferred resolution le sakta hai, aur integrated ho toh case bana sakta hai. Authorisation ke bina compensation ya delivery date ka wada nahi karna chahiye.

Q107. Kya AI shipping documents process kar sakta hai?

Jawab: Haan, document extraction invoices, labels ya shipping forms se fields nikaal sakta hai aur missing information flag kar sakta hai. Critical customs, safety aur regulatory details ko staff review kare.

Q108. Kya yeh booking confirmations bhej sakta hai?

Jawab: Haan, jab booking successfully record ho jaye aur permitted messaging channel configured ho. Confirmation mein sirf verified details aur sahi cancellation ya support information honi chahiye.

Q109. Kya yeh time-zone differences handle kar sakta hai?

Jawab: Jab relevant time zones pata hon aur validate ho gaye hon, tab scheduling workflow time convert kar sakta hai. Customer ke saath local date aur time confirm karne se galatfehmi nahi hoti.

Q110. Kya yeh office hours ke baad support kar sakta hai?

Jawab: Haan, automated support office band hone par bhi routine sawaalon ke jawab de sakta hai aur requests capture kar sakta hai. Urgent incidents ke liye ek defined on-call escalation process chahiye.

IT Services, SaaS aur Enterprise Systems

Q111. Kya Propnex maujooda enterprise software mein tasks automate kar sakti hai?

Jawab: Ho sakta hai, agar system supported API, connector ya approved automation route deta ho. Hum pehle permissions, vendor constraints aur production data badalne ke risk ko confirm karte hain.

Q112. API integration kya hota hai?

Jawab: API ek tay tareeka hai jisse software systems aapas mein information share karte hain ya actions request karte hain. Isse reliable workflows ban sakte hain aur logon ko applications ke beech data manually copy nahi karna padta.

Q113. Kya AI ERP software ke saath kaam karta hai?

Jawab: Jahan access permitted ho, wahan AI ERP workflows ke aas-paas ke kaamon mein madad kar sakta hai, jaise document intake, status queries aur exception routing. Financial postings aur doosre serious changes ke liye strong controls aur testing zaroori hain.

Q114. Kya yeh CRM platforms ke saath kaam karta hai?

Jawab: Supported CRM integration se lead updates, task creation, call summaries aur follow-up reminders mil sakte hain. Rollout se pehle field mapping, duplicate handling aur access permissions tay kar lene chahiye.

Q115. Kya yeh spreadsheets automate kar sakta hai?

Jawab: Jab format aur rules clear hon, tab automation spreadsheet data ko clean, validate, combine aur report kar sakti hai. Important outputs ko faislon mein use karne se pehle source data se check karna chahiye.

Q116. Kya yeh IT help desks ki madad kar sakta hai?

Jawab: Haan, assistant approved IT sawaalon ke jawab de sakta hai, diagnostic details collect kar sakta hai aur tickets bana ya route kar sakta hai. Account access, security incidents aur privileged actions organisation ke identity aur approval process se hi hone chahiye.

Q117. Kya AI software testing automate kar sakta hai?

Jawab: AI-supported testing test cases generate karne, failures ka summary banane ya test results ke patterns pakadne mein madad kar sakti hai. Coverage, correctness aur release readiness ko phir bhi human engineers hi verify karenge.

Q118. Kya yeh business workflows monitor kar sakta hai?

Jawab: Haan, ek monitoring layer job status, delays, failures aur kuch selected performance indicators track kar sakti hai. Alerts mein itna context hona chahiye ki zimmedar team investigate karke recover kar sake.

Q119. Kya system ko customise kiya ja sakta hai?

Jawab: Customisation business process, data access, maujooda architecture aur project scope par depend karti hai. Ek discovery phase requirements, integrations, security needs aur acceptance criteria tay karne mein madad karta hai.

Q120. Kya yeh multiple departments tak scale ho sakta hai?

Jawab: Haan, pilot ke kaam aane aur operating model ke stable hone ke baad ise expand karne ke liye design kiya ja sakta hai. Reusable components, clear ownership, permissions aur monitoring safe scaling mein madad karte hain.

Security, Privacy aur Responsible AI

Q121. Aap business data ko kaise protect karte hain?

Jawab: Solution mein appropriate access controls, secure data transfer, logging aur retention policies use honi chahiye. Exact safeguards selected data, deployment model aur applicable requirements ke hisaab se tay honge.

Q122. Kya AI hamesha sahi jawab dega?

Jawab: Nahi, koi bhi AI system har situation mein sahi hone ki guarantee nahi de sakta. Approved knowledge sources, testing, monitoring aur clear handoff rules galtiyan kam karne aur unka asar seemit karne mein madad karte hain.

Q123. Kya agent confidential information reveal kar sakta hai?

Jawab: Use is tarah design kiya jana chahiye ki woh sirf wahi jaankari de jo caller ko lene ka haq hai. Identity checks, role-based access aur unauthorised requests ke tests zaroori safeguards hain.

Q124. Kya calls record ho sakti hain?

Jawab: Recording business purpose, platform capability, consent requirements aur applicable law par depend karti hai. Organisation ko proper notice dena chahiye aur tay karna chahiye ki recordings kaun dekh sakta hai aur kitne time tak rakhi jayengi.

Q125. Aap customer consent kaise handle karte hain?

Jawab: Consent aur contact preferences applicable rules aur business policy ke mutabik collect aur record honi chahiye. Agent ko opt-out maanna chahiye aur permission na hone par baat aage nahi badhani chahiye.

Q126. Agar AI caller ko galat samajh le toh kya hoga?

Jawab: Woh important details ke baare mein andaaza lagane ke bajaye ek chhota clarifying sawaal poochega. Agar phir bhi baat clear na ho, toh woh call kisi insaan ko transfer karne ya koi doosra safe channel offer karega.

Q127. Kya hum automated actions ka audit kar sakte hain?

Jawab: Haan, jahan supported ho wahan audit logs relevant events, decisions, timestamps aur outcomes record kar sakte hain. Logs ko protect karna chahiye aur sirf organisation ki requirements ke hisaab se rakhna chahiye.

Q128. Kya AI ko har business decision lena chahiye?

Jawab: Nahi, khaas kar un faislon mein jinke legal, financial, safety ya bade personal nateeje hon. AI ka role clear hona chahiye, aur high-impact outcomes ke liye human review aur accountability honi chahiye.

Q129. Launch se pehle AI agent ko kaise test karein?

Jawab: Aam sawaal, unusual requests, beech mein tokna, accents, privacy boundaries aur failure scenarios test karein. Measurable acceptance criteria ke saath ek limited pilot, bina evaluation ke launch karne se zyada safe hai.

Q130. Jab AI ko pakka na ho, tab kya hota hai?

Jawab: Agent ko saaf kehna chahiye ki woh jawab verify nahi kar paya aur agla available step batana chahiye. Confident dikhne ke liye use kabhi prices, policies, appointment availability ya commitments apni taraf se nahi banane chahiye.

Implementation, Pricing aur ROI

Q131. Propnex ke saath project kaise shuru hota hai?

Jawab: Pehla step hai aapka business problem, users, maujooda workflow aur chahe gaye result ko samajhna. Uske baad team feasibility assess karke discussion ke liye ek proposed scope tay kar sakti hai.

Q132. Implementation mein kitna time lagta hai?

Jawab: Time complexity, integrations, data readiness, testing aur approvals par depend karta hai. Ek chhota pilot us system se jaldi ho sakta hai jise kai critical platforms se connect karna ho.

Q133. AI voice agent ki cost kitni hoti hai?

Jawab: Pricing call volume, languages, model aur telephony costs, integrations, security needs aur ongoing support par depend karti hai. Sahi estimate dene se pehle humein aapka use case aur expected usage jaanna hoga.

Q134. Kya aap free trial dete hain?

Jawab: Trial ya pilot milna proposed solution aur current commercial arrangements par depend karta hai. Aap apni requirements share kijiye, taaki team confirm kar sake ki demo ya limited pilot suitable hai ya nahi.

Q135. Quote ke liye kaun si jaankari chahiye?

Jawab: Aapke business ka goal, maujooda software, expected users ya call volume, zaroori languages, integrations aur target timeline kaam ki details hain. Isse realistic scope tay karne aur dependencies pehchaanne mein madad milti hai.

Q136. Hum ROI kaise measure karein?

Jawab: Pehle us process par abhi lagne wali cost aur time ka andaaza lagayein, phir use expected operating aur implementation costs se compare karein. Labour savings ke saath-saath quality, exception rates aur customer impact bhi track karein.

Q137. Kya ongoing support milegi?

Jawab: Support arrangements project proposal mein tay hone chahiye, jisme responsibilities, response expectations aur maintenance scope shamil ho. Updates, incidents aur improvement requests kaise handle honge, yeh bhi team ko agree karna chahiye.

Q138. Kya hum chhote pilot se shuru kar sakte hain?

Jawab: Haan, bade rollout se pehle value test karne ka yeh aksar ek practical tareeka hota hai. Ek workflow chuniye, baseline set kijiye, success measures tay kijiye aur agree kijiye ki kaun se results expansion ko sahi thehrayenge.

Q139. Agar hamari requirements badal jayein toh?

Jawab: Requirements ko ek agreed change process se review kiya ja sakta hai, jo cost, timeline, risk aur scope par asar dekhti hai. Implementation aage badhne se pehle important changes document kiye jaane chahiye.

Q140. Humari team se aapko kya chahiye hoga?

Jawab: Aam taur par ek business owner, ek subject-matter expert, relevant documentation tak access aur ek authorised technical contact chahiye hota hai. Time par feedback aur clear approval responsibilities project ko aage badhane mein madad karte hain.

Customer Objections aur Closing

Q141. Humein abhi AI automation kyun consider karni chahiye?

Jawab: Kai businesses mein aise repetitive workflows hote hain jo staff ka time lete hain aur customer responses mein deri karte hain. Ek measured pilot dikha sakta hai ki aapke operation ke liye automation kitni value de sakti hai.

Q142. Humara maujooda system theek chal raha hai, badlein kyun?

Jawab: Zaroori nahi ki aapka system badla jaye. Jahan possible ho, automation maujooda tools ke saath chal sakti hai aur jo kaam kar raha hai use disturb kiye bina manual steps kam kar sakti hai.

Q143. Kya AI se humara customer experience kharab ho jayega?

Jawab: Kharab design ki hui automation customers ko pareshan kar sakti hai, isi liye testing aur human transfer zaroori hain. Achhe design mein agent ka role clear hota hai, jawab chhote hote hain aur kisi insaan tak pahunchne ka aasaan raasta hota hai.

Q144. Hume implementation risk ki chinta hai. Hum kya karein?

Jawab: Ek limited, low-risk workflow se shuru karein aur jahan ho sake test data use karein. Live operations se connect karne se pehle rollback steps, access limits, approval gates aur success criteria tay kar lein.

Q145. Kya aap kisi specific business result ki guarantee dete hain?

Jawab: Hum workflow samajhne aur solution validate karne se pehle kisi result ka wada nahi karte. Hum measurable objectives par agree karte hain aur pilot ko unhi ke against evaluate karte hain.

Q146. Pehla achha use case kaun sa hona chahiye?

Jawab: Aisa frequent kaam chuniye jisme clear rules, available data aur dikhne wali cost ya deri ho. Aise process se shuru na karein jisme chhoti si galti bhi serious nuksan kar de.

Q147. Demonstration ke baad kya hota hai?

Jawab: Agar use case promising lage, toh agla step requirements, integrations, security expectations, scope aur commercial terms confirm karna hota hai. Kisi bhi pilot mein agreed owners, milestones aur evaluation criteria hone chahiye.

Q148. Kya aap humare maujooda IT partner ke saath kaam kar sakte hain?

Jawab: Haan, agar roles, responsibilities, access aur delivery expectations agree ho jayein toh collaboration possible hai. Maujooda IT partner ko shuru mein shamil karne se technical dependencies pata chal jaati hain aur duplication se bachav hota hai.

Q149. Main discussion kaise arrange karun?

Jawab: Apne business ka naam, jo problem solve karni hai woh, aur baat karne ka suitable time share kijiye. Team yeh jaankari dekh kar confirm karegi ki agla sahi step kya hoga.

Q150. Agar mujhe interest hai toh agla step kya hai?

Jawab: Hum ek discovery conversation arrange karenge, jisme aapka workflow aur priorities samjhenge. Uske baad team recommend kar sakti hai ki demo, feasibility review ya scoped pilot mein se kya sahi rahega.
